## CORRIGÉ TYPE

---

### CORRIGÉ DE LA TRADUCTION

**1.** Depuis longtemps, les écologistes demandent un usage répandu de l'énergie propre.

For a long time, ecologists have been asking for widespread use of clean energy.

**2.** Les marques vont essayer de se montrer plus responsables écologiquement.

Brands are going to try being more ecologically responsible.

**3.** Écoutons le discours du chef d'État.

Let's listen to the speech from the head of state.

**4.** Nous promovons cette marque depuis cinq ans maintenant.

We have been promoting this brand for five years now.

**5.** La monnaie unique sera bonne pour l'économie.

The single currency will be good for the economy.

**6.** Utilise une voiture électrique pour le bien de l'environnement.

Use an electric car for the good of the environment.

**7.** Le Parlement européen a adopté une loi pour améliorer le recyclage.

The European Parliament has adopted a law to improve recycling.

**8.** As-tu demandé au chef de produit son opinion sur cette directive ?

Have you asked the brand manager for his opinion on this directive?

**9.** Faites attention à ne pas ternir l'image de marque avec cette publicité.

Be careful not to blur the brand image with this advertisement.

**10.** Je vis en Allemagne depuis la création de l'espace Schengen.

I have been living in Germany since the creation of the Schengen passport-free area.

### CORRIGÉ DE L'EXPRESSION ÉCRITE

**11.** What kind of products is Pacific Biodiesel working with to develop biofuels and other materials?

Pacific Biodiesel makes its biofuels mostly from waste oils and vegetal products. They have been experimenting with various plants and flowers to develop new feedstocks. These have other applications beyond fuels, as they can be used as fertilizer or food for the local animals, such as fish and cattle.

**12.** Do you think investing in biofuels will ultimately be good for the environment?

While the initial development of biofuels required a substantial investment of time and money, it has been deemed worth the cost by the Sustainable Biodiesel Alliance, as they should reduce carbon emissions. The fact that the company sells its biofuels to customers that are a short distance away also helps reduce the costs.
